Flash&Start®

INTERNET **PROTECTION**

Pro & **Pro+** version

About **FlashStart**

The Cloud

The FlashStart Cloud runs on geographically diverse server farms using **Anycast network** technology, to provide a **high service availability and low latency**. There are two FlashStart services, each coming with professional support, full reporting and rich in features.

Pro Version

This is an advanced DNS based content and malware filter creating a **safe**, **legal** and **regulatory compliant internet experience**.

Pro+ Version

All the features of features of **Pro** but integrating with a **Microsoft Active Directory** environment to provide more granular blocking, logging and reporting activities.

Service Providers

FlashStart is ideal to integrate as part of an **MSP**, **ISP** or **WISP** service. FlashStart supports many integration possibilities such as API's, BGP network integration, on-premis / near premis deployment models and **White Labeling**.
Service operations are controlled using a modern dashboard which is easy to use, scalable and supports **multi-tenancy**.

Easy to **Install** and **deploy**

Pro Version

Pro version **requires no new hardware** or **software** to implement but simply relies on DNS redirection on any network router. Many routers can be set up with just a few keystrokes or in **just a few minutes** The FlashStart implementation offers excellent resilience against attempts to encrypt DNS or use alternative DNS resolvers.

Pro+ Version

Pro+ version allows integrates with both on premis and cloud based Active Directory environments. This is done using a **native MS-Windows Connector Plug-in** which for convenience can be implemented in two ways:

» **DNS-proxy virtual machine** (ex. Vmware/HyperV/KVM) or
» **OS plug-in** on a **third-party Gateway** (ex. Pfsense, Opensense, etc. please check for availability)

Who needs FlashStart ?

MSP / ISP - WISP / Business / Schools - Universities / Hotels / Public WiFi / Transportation Systems / Residentials

Comparative table

	Pro version Content & Malware Filter	Pro+ version Contente & Malware Filter + MS Active Directory integration
Content Filter	●	●
Malware protection	●	●
Geoblocking support	●	●
Search engine protection	●	●
Reporting and analysis	●	●
DNS-base filtering profiles	●	●
Multi-tenant dashboard	●	●
MS-Active Directory integration + native Windows Agent		●
On-premis local DNS cache		●
Per-group/user granular filtering		●
Workgroup per-machine policy		●
Per-group reporting (GDPR compliant)		●
Infected PCs automatic detection (coming soon!)		●

Simple, fast, powerfully, usable by any device.

Main features

flashstart.com

Content filter
Protect users internet experience removing unwanted, illegal and dangerous contents. High protection customization according to over 90 system blacklist categories updated 24x7.

Malware prevention
Block malwares, botnet, phishing, ransomware and many other with global top class protection feeds

Granular Filtering & Active Directory synch
Permits to use different filtering policies for different users, groups and internal workstations. A native MS-Active Directory synchronization is fully supported.

Geoblocking
Stop accessing countries with a reputation for ransomware, malware and other risks

Reporting & analysis
Reports by categories and macro categories visited, in real time, and scheduled by e-mail

Multi-Tenant dashboard
Allowing administrators to easily create and manage tenants (clients), which are isolated from each other under a single deployment.

Global anycast newtwork
Distributes FlashStart services globally with 99,99999% uptime with national redundant and balanced datacenters

Excellent Support
Provides 24x7 support in English, Spanish & Italian languages with high-skilled customer engineers and dedicated accounts to better fit any scenario

Compatible with any Router & Device
Compatible with any Router, HotSpot Wifi, Firewall and gateway. Supports static and dynamic IP & DDNS protocol. "Self-configuring" Push-Device Kit. Client available for Microsoft Windows.

18 Years of Experience
FlashStart is well respected for proven security products, over many years, widely deployed in thousands of companies, schools and organizations around the world
